HONESTY DECLARATION

My name is (YOUR FULL NAME). I would like to declare that, apart from the acknowledged references, this thesis either does not use language, ideas, or other original material from anyone; or has not been previously submitted to any other educational and research programs or institutions. I fully understand that any writings in this thesis contradicted to the above statement will automatically lead to the rejection from the SE program at the International University - Vietnam National University Ho Chi Minh City.

ACKNOWLEDGMENTS

It is with deep gratitude and appreciation that I acknowledge the professional guidance of Dr. Nguyen Van B. His constant encouragement and support helped me to achieve my goal.

TABLE OF CONTENTS

1	Introduction	12
1.1	Background and Motivation	12
1.1.1	Introduction	12
1.1.2	State of the Art	12
1.1.3	Rationale	12
1.1.4	Problem Statement	12
1.1.5	Objectives	12
1.1.6	Scope and Limitations	13
1.1.7	Research Framework	13
1.1.8	Structure of the Thesis	13
2	Materials and Methods	14
2.1	Overview of the Methodological Workflow	14
2.2	Model Formulation	14
2.2.1	Model Components	14
2.2.2	Equations	14
2.3	Data Collection and Preprocessing	14
2.3.1	Dataset Structure	14
2.3.2	Preprocessing Steps	14
2.4	Methodology	14
2.4.1	Method Description	14
2.4.2	Implementation Details	14
2.5	Evaluation Metrics	14
2.5.1	Summary of Chapter	14
3	Results	15
3.1	Evaluation Setup	16
3.2	Main Results	16
3.2.1	Result Category 1	16
3.2.2	Result Category 2	16
3.3	Quantitative Analysis	16
3.3.1	Statistical Analysis	16
3.4	Summary of Observed Results	16
4	Discussion	17
4.1	Interpretation of Results	17
4.2	Comparison with Previous Work	17
4.3	Limitations	17
4.4	Implications	17
4.5	Future Work	17

5	Conclusion	18
5.1	Summary of Contributions	18
5.2	Key Findings	18
5.3	Significance	18
5.4	Future Directions	18

ABBREVIATIONS AND NOTATIONS

ABSTRACT

Insert abstract here; it should not exceed one page. Abstract text must be double-spaced with no paragraph breaks. Here are some form and style tips: (a) Limit the abstract to one typed page; (b) maintain the scholarly language used throughout the thesis; (c) keep the abstract concise, accurate, and readable; (d) use correct English; (e) ensure each sentence adds value to the reader's understanding of the research; and (f) use the full name of any acronym used again in the abstract, and include the acronym in parentheses. Do not include references or citations in the abstract.

Format: Font Time News Roman, Font size: 12.

CHAPTER I

INTRODUCTION

The Introduction presents the background of the thesis work. It reveals the state of the art of the topic by quoting previously published works in the fields and important questions that your work relates to them. It should contain parts such as Rationale, Problem statement, Objectives, Scope, Limitation, Research framework, Structure of research and the summary of the contains of the following parts of the report. It is important that this section be unique and specific to the report. As a common practice, it is conceived before you do your work but is written when you finish writing all other chapters. Most of its contents can be used in your thesis report.

Your text should begin from here. This is the illustration for the use of the level-1 title style

1.1 Background and Motivation

Your text should begin from here. This is the illustration for the use of the level-2 title style

1.1.1 Introduction

1.1.2 State of the Art

1.1.3 Rationale

1.1.4 Problem Statement

1.1.5 Objectives

The specific objectives of this thesis are as follows:

1. Objective 1
2. Objective 2

3. Objective 3

1.1.6 Scope and Limitations

1.1.7 Research Framework

1.1.8 Structure of the Thesis

CHAPTER II

MATERIALS AND METHODS

2.1 Overview of the Methodological Workflow

This section should provide an accurate description of all methods and materials used in your study. It should be written in the past tense in the passive voice. Provide sufficient detail to allow the work to be reproduced, with details of supplier and catalogue number when appropriate. Methods already published should be indicated by reference: only relevant modifications should be described

2.2 Model Formulation

2.2.1 Model Components

2.2.2 Equations

2.3 Data Collection and Preprocessing

2.3.1 Dataset Structure

2.3.2 Preprocessing Steps

2.4 Methodology

2.4.1 Method Description

2.4.2 Implementation Details

2.5 Evaluation Metrics

2.5.1 Summary of Chapter

CHAPTER III

RESULTS

Summarize the findings without interpretation. Results should be clear and concise. Only analyzed data should be presented in forms of figures, graphs, tables and/or text descriptions of observations. Avoid using phrases that are vague or non-specific, such as, "appeared to be greater than other variables..." or "demonstrates promising trends that..." Subjective modifiers should be explained in the discussion section of the paper [i.e., why did one variable appear greater? Or, how does the finding demonstrate a promising trend?].

When presenting statistically summarized data, you should state whether the number is a mean or median and clearly state how the data spread is expressed ($\pm$ standard deviation, $\pm$ standard error of the mean, or inter-quartile range). When claiming a statistically significant result, you must support such a statement with a declaration of the probability (p) value and the test that was used to generate that value.

When presenting results from your study, use the past tense when referring to your results.

All Figures and Tables should be numbered chronologically as they appear in your thesis. All Figures and Tables must be referred to in the text to facilitate reading. And they should be displayed in embedded data format, not compressed photos/pictures. See further guidelines for constructing tables and figures in Part 3.

Use the past tense when referring to your results.

3.1 Evaluation Setup

3.2 Main Results

3.2.1 Result Category 1

3.2.2 Result Category 2

3.3 Quantitative Analysis

3.3.1 Statistical Analysis

Column 1	Column 2
Data 1	Data 2

Table 3.1: Your table caption goes here.

3.4 Summary of Observed Results

CHAPTER IV

DISCUSSION

This should explore the significance of the results of the work, not repeat them. Discuss all the significant outcomes of your research; see how they fit with our current understanding of the research areas or what implications it implies for future studies or industrial application. Any limitation or weakness of the research should also be discussed and ended up with recommendations for possible improvement.

Use the present verb tense, especially for established facts; however, refer to specific works or prior studies in the past tense.

If needed, use subheadings to help organize your discussion or to categorize your interpretations into them.

4.1 Interpretation of Results

4.2 Comparison with Previous Work

4.3 Limitations

4.4 Implications

4.5 Future Work

CHAPTER V

CONCLUSION

This section should state the conclusions and recommendations that you have drawn from your work (in relation to the research question or tested hypothesis) and relate the findings of your study to previously published work. Students should avoid stating the key results here instead of conclusions. Recommendations should be relevant to your research findings to provide the readers with tips, suggestions or modes of action so that they can follow if interested.

5.1 Summary of Contributions

5.2 Key Findings

5.3 Significance

5.4 Future Directions
